DDI PDC Bits Repairs

Diamond Drilling Industries Inc. has partnered with First Corp International Inc. to repair all types of PDC Drill Bits. First Corp has a state of the art repair facility located in Fort Worth Texas. First Corp spends countless hours of continuing education to perfect the PDC repair techniques to ensure that when your bit is returned you can drill with confidence and knowledge that your bit repair was done right the first time.

First Corp International has the number 1 rated repair shop by customers.

A comprehensive 15-point inspection of each and every bit is completed before an estimate is given to our customer's. We do these extra steps to ensure that your drill bit is ready to drill when you receive it.

We provide a written repair estimate, so you always know the repair cost upfront.

Our repair cost will not change once an estimate is approved. No hidden cost.

The Final Cost was \$ 850.00 USD, and it was repaired in one day

We work hard to ensure that you pay the lowest shipping rates to and from our state of the art repair facility. The extra work that we put into ensuring that we keep our shipping cost at a minimum allows us to pass that savings on to you, guaranteeing that you get the lowest shipping cost possible. This is a service that we provide our customers so that they save money in all areas of the bit repair process.

We offer this service all around the world.
Call today and let our logistics team get your repair process started.

PDC BITS REPAIRS

First Corp International Inc. will repair your PDC Drill Bits so that they drill like new, and they will look like new also.

We repair bits for companies all around the world.

These bits were used for Water Well, and Geothermal drilling

First Corp International has the fastest turn around repair time. This way you have less down time and more time drilling so that you are more productive. Our goal at First Corp International Inc is to assist you the driller in making your rigs as profitable as possible

First Corp can repair any PDC Bit. It does not matter who manufactures the PDC Bit we can fix it. We can fix bits that other companies cannot repair. If a bit cannot be repaired we will tell you the first time. We do not repair a bit unless we can insure that your bit will run. We can repair your bit regardless of bit size or PDC Cutter Size.

Below are some examples of the bits that came to us for repair.

PDC BITS REPAIRS

Complete satisfaction is our goal for each and every repair. If you have an issue with your repair we will work hard to make it right.

First Corp International Inc. guarantees that your bit will NOT have cutter loss after your bits are repaired. We do not blame the driller for cutter loss. If a bit loses a cutter after we have completed your repair we will repair your bit for NO CHARGE!

We understand how hard and expensive shipping can be to get a bit sent out for repair. Let our logistics team help you book your next shipment.

We have relationships with most of the large trucking and freight forwarding companies to ensure that we get the best time in transit and lowest cost. We can book your freight and have a company pick it up from your location anywhere in the world.

If you are shipping your bit to us from another country, we can help with the custom clearance and get all the paper work processed through our broker with low cost. We will arrange the air freight back to you with the proper documents so you do not have issues getting your bit back. We import and export all around the world on a daily basis.
